

# German for Nursing Professionals Course

In the „German for Nursing Professionals“ course, you will learn to master everyday professional language better through effective vocabulary expansion, situational exercises, and plenty of communication.

## Description

You will practice typical conversational situations, train your reading and listening comprehension, and work on the most important tasks you face daily at work (both written and oral). Through selected grammar chapters, vocabulary, and pronunciation exercises, you will learn to communicate correctly and confidently! The units are rounded off with specialized vocabulary training for the nursing field.

Our placement test helps you better assess your language level before the course begins.

## Goal

Your native language is not German. You have training in the nursing field or are already working in a medical nursing profession and want to communicate better and more securely with patients, their relatives, and colleagues? Then this course will help you meet the many demands in the German language.

## Target Group

People working in the healthcare sector, such as:

- Qualified health and nursing staff
- Nursing assistants
- Advanced nursing assistants
- Medical assistant professions
- Home helpers
- 24-hour caregivers

## Prerequisites

German language skills at A2 level

## Instructor

Mag. Julia Perez-Flores
