# CERTIFICATION PROGRAM CLEANROOM EXPERT

## CLEAR FOCUS ON CLEANROOM

More manufacturers are sharpening their competitive edge by implementing higher standards in their cleanrooms. Highly trained and reliable staff is a critical factor in realising that goal.

The Cleanroom Expert Certification Program is designed with that in mind: High quality work is the product of high quality training!

### **THIS PROGRAM OFFERS:**

By means of our Cleanroom Expert Certification Program you will gain extensive knowledge and proficiency with cleanroom hygiene, technology, and quality assurance. This certification program endows participants with Comprei's recognisable quality standards. After completing all course modules, and successfully passing a final examination, you will be granted a Cleanroom Expert Certificate!

### **THIS CERTIFICATION PROGRAM HAS BEEN DEVELOPED FOR THE FOLLOWING INDUSTRIES AND PROFESSIONS:**

#### **INDUSTRIES**

- » BIOTECHNOLOGY
- » BLOOD BANKS
- » PHARMACIES
- » COSMETICS
- » FOOD INDUSTRY
- » MEDICAL DEVICE MANUFACTURING
- » NUTRITIONAL SUPPLEMENT INDUSTRY
- » PHARMACEUTICAL
- » PHARMACEUTICAL INDUSTRY SUPPLIERS

#### **PROFESSIONS**

- » AUDITORS
- » PUBLIC OFFICIALS
- » DOCUMENT MANAGERS
- » PERSONNEL QUALITY CONTROL
- » MEDICAL STAFF
- » PRODUCTION MANAGERS
- » QUALITY ASSURANCE SUPERVISORS
- » CLEANROOM OPERATORS
- » TRAINING ADMINISTRATORS
- » TECHNICAL DEPARTMENTS:  
SERVICE AND MAINTENANCE
- » VALIDATION SPECIALISTS
- » HYGIENE AND  
CLEANING ADMINISTRATORS

## MODULE 1 – CLEANROOM HYGIENE

Hygiene plays a crucial role in cleanrooms. At any given time, the human factor has the potential to impact a cleanroom environment. This presents a unique challenge to all personnel.

Module 1 increases awareness of how to perform tasks in appropriate and responsible ways, and the proper selection and

application of suitable work equipment in this highly sensitive facility area.

During this module, crucial factors such as a sterile apparel system, and cleanroom facility or microbiological monitoring, will be depicted and demonstrated in a practical manner.

## MODULE 2 – TECHNOLOGY

In this module, the knowledge and skills required to coordinate all stages of designing, constructing and certifying cleanrooms will be imparted by means of theory and subsequent practical exercises. Participants will be equipped to prepare cleanrooms to pass industry standard compliance audits. In group settings, participants will also get

acquainted with optimizing airflow patterns, and obtain a technical understanding of different barrier systems, and where they should be implemented.

Gain an understanding about the characteristics of various cleaning and sterilization techniques, and deeper insight into the rationale behind them.

## MODULE 3 – QUALITY ASSURANCE

One of the most challenging responsibilities of any business, is ensuring employee safety and product quality.

Module 3 addresses the relevant legal requirements, and how they can be paired with cleanroom hygiene and technology. An extensive understanding of pharma-

ceutical level quality and risk management will be reviewed. Among other things, an in-depth examination of the legal requirements of occupational health and safety, as well as laws and regulations on dealing with hazardous chemical substances, disinfectants, and equipment in a quality management system will also be discussed.

### DATES

Duration: 9 days  
(3 modules, 3 days each)  
For upcoming events, see insert or check out [www.comprei.eu](http://www.comprei.eu)

### COURSE FEES

For course fees, see insert or check out [www.comprei.eu](http://www.comprei.eu)

### LOCATION

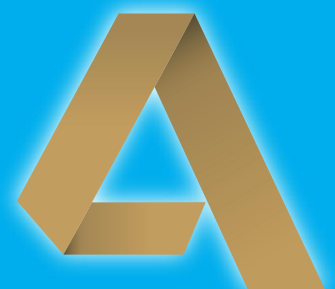

BOKU – Department of Biotechnology  
Muthgasse 18, 1190 Wien  
Austria
